You love what you do, now love where you do it.

As an Information Technology Services (ITS) Project Manager for Community, you will be responsible for managing the completion of multiple high-priority projects within ITS, including multi-department operational teams. You should be an excellent problem solver with keen attention to detail, demonstrating expertise in utilizing project management principles, all while collaborating with multiple departments and leaders across the organization. From conducting project feasibility studies, to defining project scope, to working with vendors and their respective product implementation teams, you will ensure adequate support and management.

Qualifications:

Education & Experience

- Bachelor's Degree in Computer Science, Information Systems or related field required
- Equivalent combination of education and experience may be substituted experience
- 5 years of project management experience required

Disclaimers:

- Pay ranges listed are an estimate and subject to change.
- If any bonuses are noted, they are only applicable to external hires meeting criteria.
